

# A Subtle Metamorphosis of Light: Silence in Motion

## *The power of light*

The light installation “*sparkle*” narrates an abstract interpretation of nature. It explores fascinating contrasts—the duality of stillness and motion, the fleeting beauty of the moment, and the profound power of light.

Delicately woven lines of light, seemingly weightless and suspended from the ceiling like shimmering icicles, draw inspiration from nature’s imagery.

## *Easy installation!*

Powered by ENTTEC’s ELM software, 22 PLink Injectors, some Splay Lite and 3 Pixelator Mini, this installation features 22 light ropes, spanning a combined length of 33 meters and containing 1650 pixels across 16 DMX Universes.

Fritz, creative engineer at studio.tschumperlin, says "*With the ELM software and the 3D mapping, I was able to divide the layout into five different layers, adding more depth to the mapping, which looks amazing in the room!*"...

LiGHT Expo - Islington, London 2024

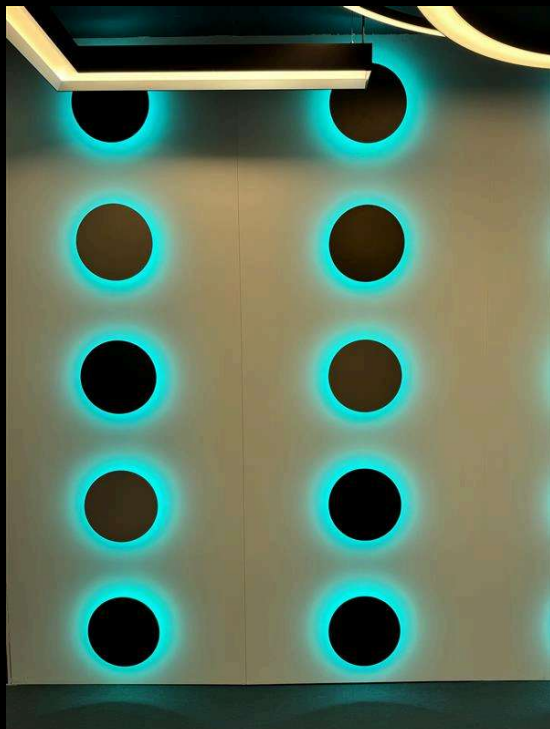

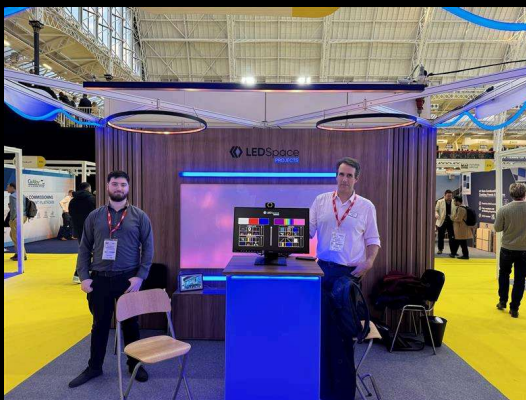

November  
LiGHT 24  
London, UK

## Where Lighting and Design Unite

While the American team was busy showing off our newest products at IAAPA Expo in Orlando- America; the European team was meeting and talking to visitors at LiGHT24 in London, UK's only trade show dedicated to high-end lighting specification.

Thank you to LED Space for showcasing our ELM software and OCTO controller.

## Neon Flex: UL Certified!

We're excited to introduce ENTTEC's NEON FLEX, now UL Certified! Crafted to meet the highest safety and quality standards, this flexible LED strip is perfect for both indoor and outdoor applications. With custom options tailored to your specific needs, along with a 3-year return-to-base warranty (with extended coverage available), NEON FLEX ensures reliability and performance. Bring your vision to life with confidence—whether it's for architectural, entertainment, or signage projects!
