Showcasing the power of CVC4

Over 300 units of the CVC4 have been integrated at Dubai CommerCity to enhance the lighting control across this innovative business hub. As the region's first dedicated e-commerce free zone, Dubai CommerCity offers a dynamic, future-focused environment, making it the ideal setting for advanced lighting solutions like the CVC4.

A Touch of Innovation: Interactive Lights in Cairo, Egypt

Powered by ENTTEC's ELM software, interactive poles in Cairo create dynamic color shifts in response to visitors' movements, offering a unique and immersive experience that brings the space to life. Click the link below to watch.

ENTTEC at IAAPA North America

At IAAPA Expo America 2024, the world's largest trade show for the attractions industry, the ENTTEC US team connected with industry professionals and showcased the latest innovations to a dynamic audience. ENTTEC proudly featured its own Smart Pixel Dot range and the Neon Flex, which are now both UL certified! The booth was filled with creative energy, sparking exciting conversations about how ENTTEC's technology transforms their project.

We're grateful to everyone who stopped by and made the event a success!

Smart Pixel Dots

Robust and reliable, ENTTEC's 16-bit resolution, individually-addressable dots series are designed to withstand the harshest environments, outdoors and indoors. Manufactured in Australia, the strings of SMART PXL dots can be configured to your requirements. Engineered to create spectacular, crisp lighting effects, they add a stylish design element to any architectural, commercial or entertainment project.

LED Pixel strips

ENTTEC's 12V LED Pixel strip range is perfect for long runs while maintaining output quality. Manufactured to the highest standards, we custom-design our own PCB layouts. What's more, we use extra-wide 3oz copper tracks to ensure minimal voltage drop and maximum performance. All of our strips feature a 32-bit, True Color display and adhesive backing for easy installation.
