Completing the S-PLAY series, the LITE is here!

We're proud to unveil the **S-PLAY LITE** - the latest addition to our industry-leading range of smart lighting show controllers.

An impressive recording, scheduling and playback tool that can be triggered by external events, the **S-PLAY LITE** enables

- **Create, record, edit, schedule & play back shows**
- **Record and play up to 16 Universes of**

so many creative possibilities to be brought to life.

Offering unparalleled versatility and reliability, harness the power of precise cue management and seamless integration in your next project with an impressive 16 Universes of output at a price sure to make any integrator smile.

It is ideal for home automation, façade lighting, art installations, building management systems, conference rooms, hotel and hospitality lighting, archtainment projects ... and much more.

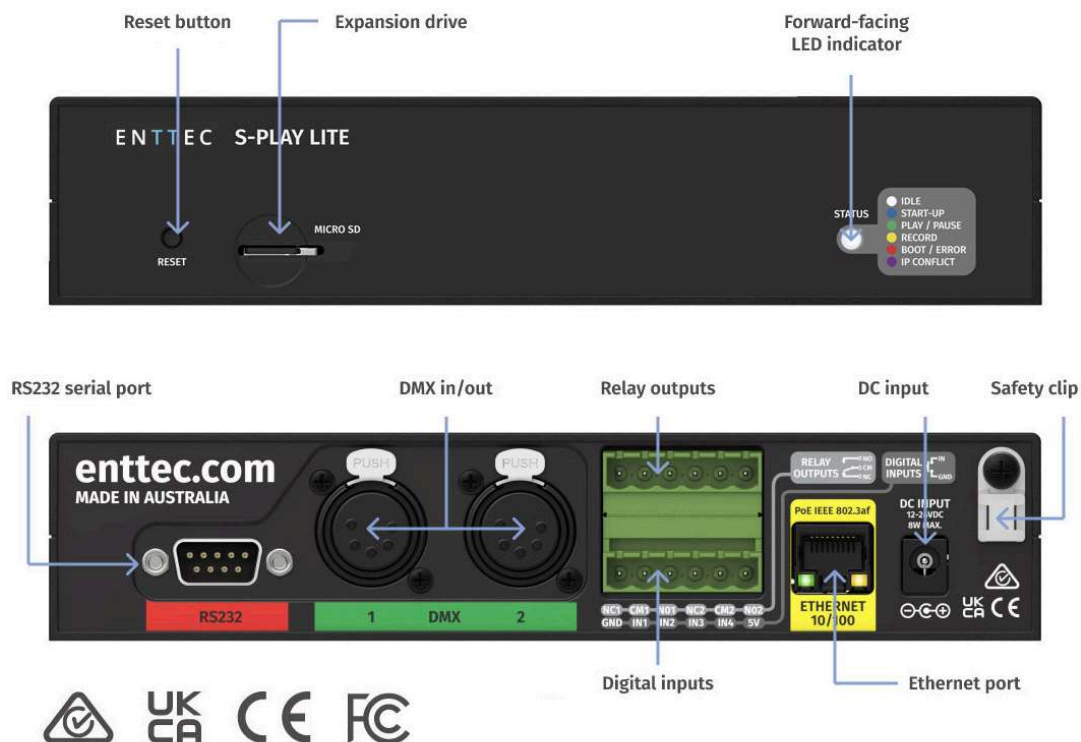

Explore the S-Play LITE

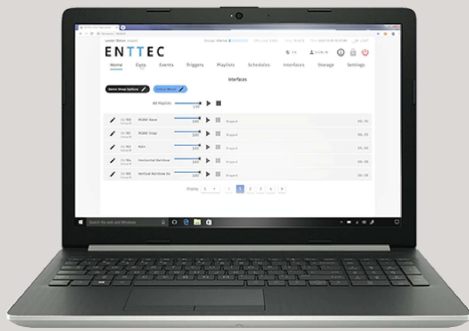

sACN or Art-Net

- **Ideal for home automation projects**
- **User-friendly web interface**
- **Trigger external events using a wide range of devices**
- **Expandable storage using the SD card slot**

16-universe, all-in-one DMX recorder + smart light show controller.

Connectivity

Intuitive web interface.

Manage and program your **S-PLAY LITE** using its intuitive browser interface, with everything you need at your fingertips.

Record and edit up to 100 static, dynamic and effect cues, as well as 100 playlists using the intuitive timeline editor.

With support for 150 events, assign remote triggers and map different streams and protocols to different ports.

Even create a custom interface to give the end-user only the simple the options they need at hand.

Imagine *extreme* control ...

EVENT LIGHTING

Electric Picnic Festival

ENTTEC's lighting solutions have helped rock many music festivals over the years. One of our favorite installations was at Ireland's Electric Picnic Festival.

While the likes of Kendrick Lamar, Massive Attack and The Prodigy took to the main stage, the surrounding forests came alive with local artists and DJs under the guise of Transmission-space: an intergalactic experience where you can party with friends and aliens alike.

Ali Kemal Ali's huge UFO sculpture was hooked up to 5,500 LED pixels thanks to Luke Maguire, who used two ENTTEC **PIXELATOR MINI**s and a series of **PLINK INJECTORS** to control his dazzling light show, setting the scene for an epic weekend.

"The ENTTEC equipment was very easy to use and very powerful. I especially liked the screw terminals on the PLinks which made it very easy for me to test the strips once installed," says Luke.

TIPS + TRICKS

Learn how to make a lightbox

Ever wanted to learn how to make a cool LED lightbox? It's easier than you think!

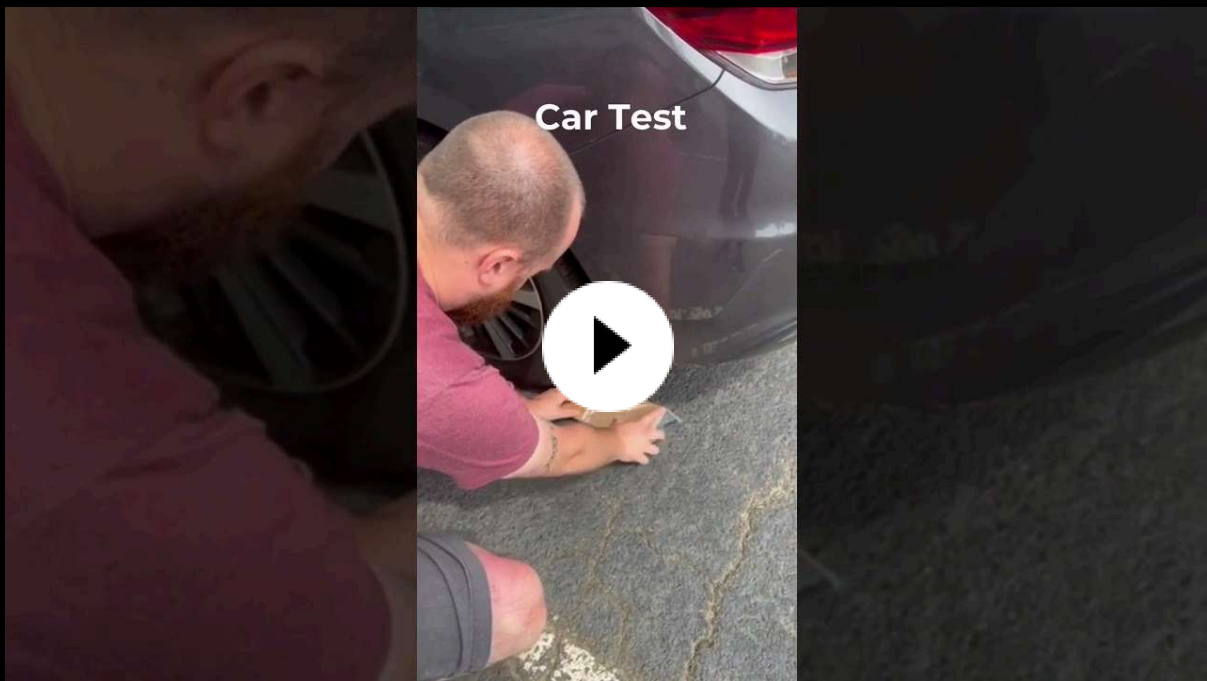

Join our US office as they take you through some simple steps to creating an impressive light fixture - starting with this little introduction. Be sure to follow our [Instagram](#) account for forthcoming episodes and you'll be able to make yourself a stunning lightbox in no time at all.

TECHNOLOGY

Watch our SMART PXL dots undergo a rigorous test!

Discover how our innovative [SMART PXL LED PIXEL DOTS](#) stand up to extreme conditions, ensuring top performance for all your lighting projects. Check out the action to see why ENTTEC is a leader in durable lighting technology.

COMPLIANCE

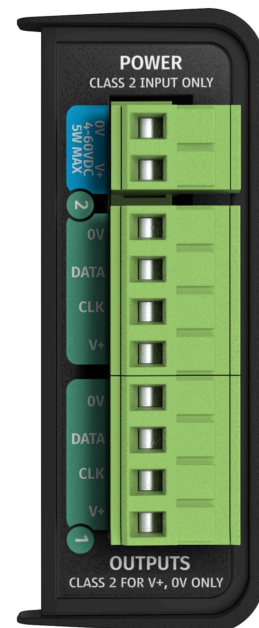

ENTTEC OCTO attains UL status

The ENTTEC OCTO, our popular 8-universe eDMX to LED pixel controller, has achieved UL certification, marking a significant milestone that underscores its safety, reliability, and quality standards.

Having passed rigorous tests from America's leading compliance organization, you know you can depend upon the OCTO's adherence to electrical safety, reliability, and performance standards.

As the trusted choice for professionals seeking a high-quality, dependable lighting controller, there's never been a better time to explore what the ENTTEC OCTO can do for your project - and just in case you needed any further excuse to grab one, remember that this compact device can even output up to 16-universes in Overdrive Mode!
