

The Beloved Ocular Organ by Dark Moon Designs @ Electric Forest

A Brilliant Revival: The Ocular Organ at Electric Forest with ENTTEC

As we say goodbye to summer, we celebrate some of the really cool projects that made the season unforgettable. Check out how Dark Moon Designs brought new life to this amazing festival project using our gear!

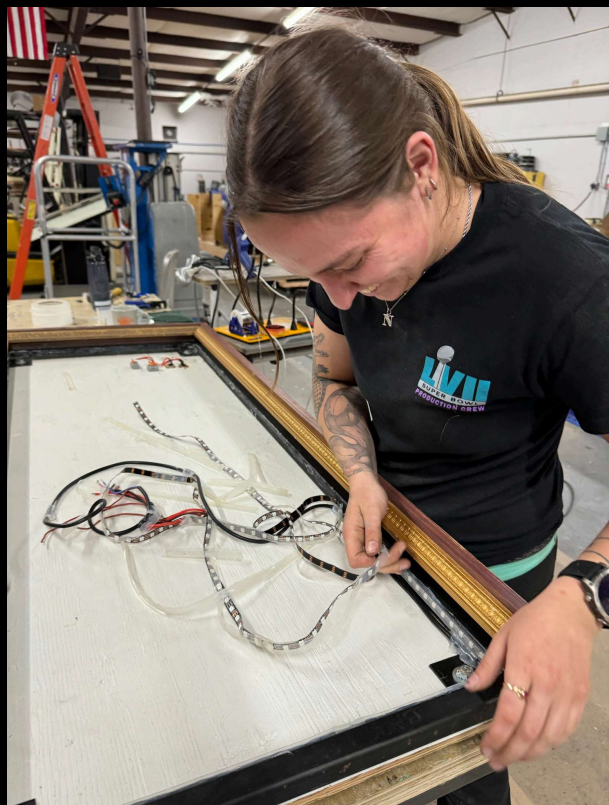

Check out how Dark Moon Designs brought new life to this amazing festival project using our LED control devices!

One of the most cherished installations at Electric Forest is the Ocular Organ, a captivating creation brought to life by the talented design team at Dark Moon Designs. This ingenious project, illuminated with ENTTEC's Pixelator Mini and powered by our Plink Injectors, has been a festival favorite for years.

This year, under the expert guidance of Natalia from Dark Moon Designs, the team undertook a significant revamp of the Ocular Organ. They introduced new ENTTEC control devices and implemented a cleaner, more efficient installation, enhancing the overall experience. As always, the organ was a magical success, enchanting festival-goers with its vibrant display.

We are thrilled to see the Ocular Organ continue to bring joy to

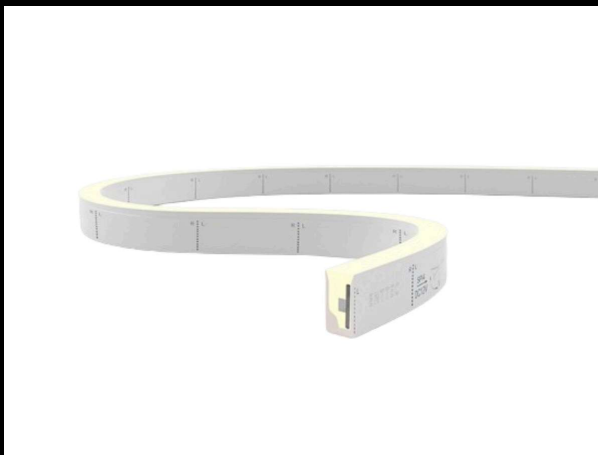

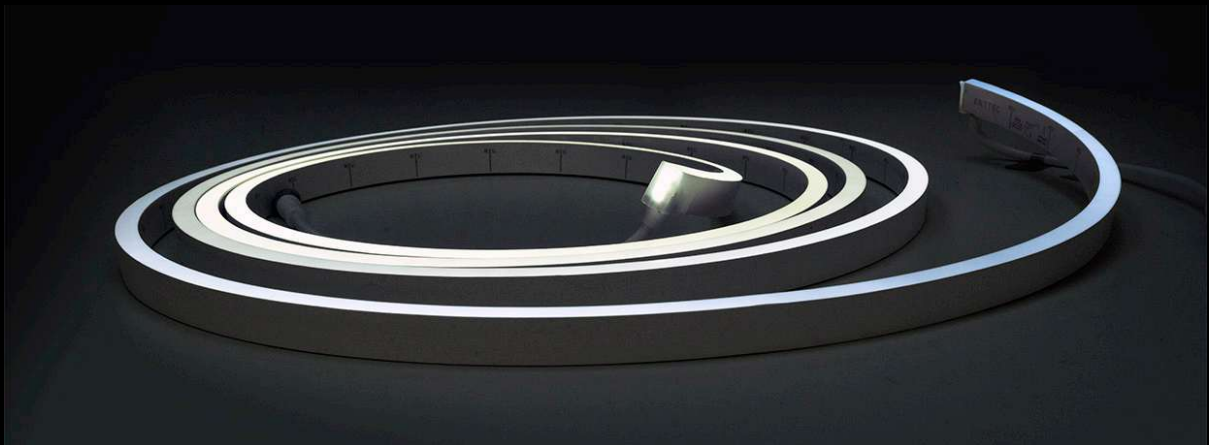

Electric Forest attendees, and we look forward to its presence for many years to come!
